# One Comprehensive Dental Resource

## Dental Mammoth

Dental Mammoth Ltd is a globally operating dental publishing company. Dental Mammoth's mission is "Skills are based on knowledge" – we produce innovative information services and products to support clinical work and education.

## Global Dental Family

Dental Mammoth has a vision: we wish to see the quality of oral health improved all over the world. This will take place through a collaboration of high-level international professionals. Dental Mammoth gathers momentum all the time.

## Both for clinicians and students

Dental Mammoth gives tools and information for dental professionals and students.

Working and studying becomes more efficient and patient safety improves. Relevant and reliable knowledge in an easy to find format is essential for high-quality care.

## Skills are based on knowledge

Dental professionals often work alone, under physical and mental stress. A key to successful performance is the ability to find essential data at the point of care. A modern thoroughly tested portal answers for all demands: quickness, reliability and relevance.

## A global network of prominent professionals

Dental Mammoth solutions are based on a global network of oral health professionals. Their collaboration with Dental Mammoth guarantees that we can offer cutting-edge content globally.

## Online portals

Dental Mammoth Online Portal offers valuable oral health content for customers.

The portal structure can also be customized, and specific customer related content can be integrated.

Online knowledge portals with Dental, Medical and Drug databases

## Dental Database – Therapia Odontologica

Covering all dental disciplines this database contains the relevant knowledge comprehensively in practical form. Easy to use clinical guidelines and other materials are supported by scientific evidence.

## Evidence-Based Medicine Guidelines

The most relevant dental aspects are combined with up-to-date general medicine database supporting decision making at the point of care.

## Dental Products and Services

This database contains the products and services of our partners. Products can be found by using search words or categories: Product group, Manufactures or Distributors.

## Inxbase – Riskbase

Inxbase and Riskbase are drug interaction and adverse drug effects databases. They offer evidence based decision support for drug therapy.

## Gravbase – Lactbase

Gravbase and Lactbase offer decision support for drug use in pregnancy and lactation.

## Renbase

Renbase is a unique decision support database on the safety and dosage modifications of drugs in patients with renal failure.

## Heparbase

Heparbase gives unique decision support for drug treatment in hepatic impairment.

## Herbalbase

Herbalbase offers evidence based analysis on the efficacy and safety of natural medicines.

## Xreactbase

Xreactbase covers evidence-based knowledge on cross-hypersensitivities of drugs which cause preventable drug harm.
