

Hygga LTD and Dental Mammoth LTD to work together

Dental Mammoth LTD and Hygga LTD have teamed up in order to improve the quality and availability of oral health care services both domestically and internationally. It is also hoped that said collaboration will help create more efficient oral health care services for current and future clients.

“Hygga is an innovative partner, and our collaboration will help us reach common goals to improve the quality and efficiency of dental care internationally. Both organizations share a deep understanding of the nature of the work, daily lives and resources of dental professionals. We are able to share our combined expertise for the benefit of our customers by creating solutions that make processes more efficient,” says Heikki Autti, CEO of Dental Mammoth LTD.

“Dental Mammoth is a Finnish pioneer of sorts in this field, which, like Hygga LTD, invests in the development of oral health care in addition to the efficiency of knowledge management. Such cooperation is aimed especially at the international market, increasing Finnish awareness of the industry's expertise in both Central European and Indian markets. The solid foundation for cooperation is the high degree of practical understanding and expertise of both parties in clinical operations and their respective development needs,” explains Jussi Heiniö, CEO of Hygga Oy.

Dental Mammoth in brief:

Dental Mammoth LTD supports dental professionals and students in their clinical work and professional development where sourcing of relevant information is concerned. The company is a reputable organisation founded in 2012, which exports products developed in Finland that are compatible with and meet the needs of the global market, where they use experts on the ground for product localisation.

Hygga in brief:

Hygga LTD was founded in 2010 out of a desire to streamline dental care services in order to make them available to everyone. Hygga is a health and wellness promoter that offers its customers a new way to deliver healthcare services and a real-time snapshot to improve information management.

At the heart of Hygga's service is an ERP system called '**Hygga Flow**', a real-time resource management system which improves the manageability and transparency of operations, significantly enhances staff satisfaction, and improves the customer experience via a one stop shop approach. 'Hygga

Flow' enables smooth customer flow control and flexible treatment times, which can be used to shorten treatment cycles and significantly reduce patient treatment queues. Hygga's operating model scales well in both the public and private sectors in the Finnish and international market.
